ABOUT

Collections

COLLECTION 01

Le Clair & l'Obscur

The concept of light and dark emanates from an opposition, a difference. A difference in color, in brightness as one can perceive between day and night, the dark night sky and its stars, gold and silver, raw and shiny.

The Light and the Dark show us the beauty of the sun and the moon, the way the stars stand out without overshadowing the darkness of the sky. These pieces represent a golden sunset that is confronted with the silvery reflections of the clouds on a foaming sea.

COLLECTION 02

Constellation

The muse of this collection is the stars' constellation. These lights, up in the sky, created by astronauts, dan- cing in orbit here and there above us. If we link them, we can perceive constellations fully. We imagined our col- lection the same way - gems and jewels are delicately orbiting around our wrists, hands and ears. Just like in the sky, they are disposed on us and continue to move and shine from afar.

The endlessly small contained in the gems is what speaks for the endless grandeur of the universe and its stars. Uninterrupted lines arch around the body and leave treasures on the skin. It's a movement or a danse was paused, captured and transformed as jewelry.

COLLECTION 03

La Rosée

Each piece in this collection comes from the early morning. A moment still marked by the cool night. Chains dressed in drops of water, watered earrings, beaded rings. SOL is about light, and The Morning Dew is the introduction to light.

The cool of the night recedes and the sun's rays begin to diffuse through the light played by the moonstones. Adularescence is the phenomenon specific to moonstones.

It is a reflection under the surface of the stone sometimes bluish, white or full of colors. It brings a mystical side to this dew that announces a warm and sunny day.

COLLECTION 04

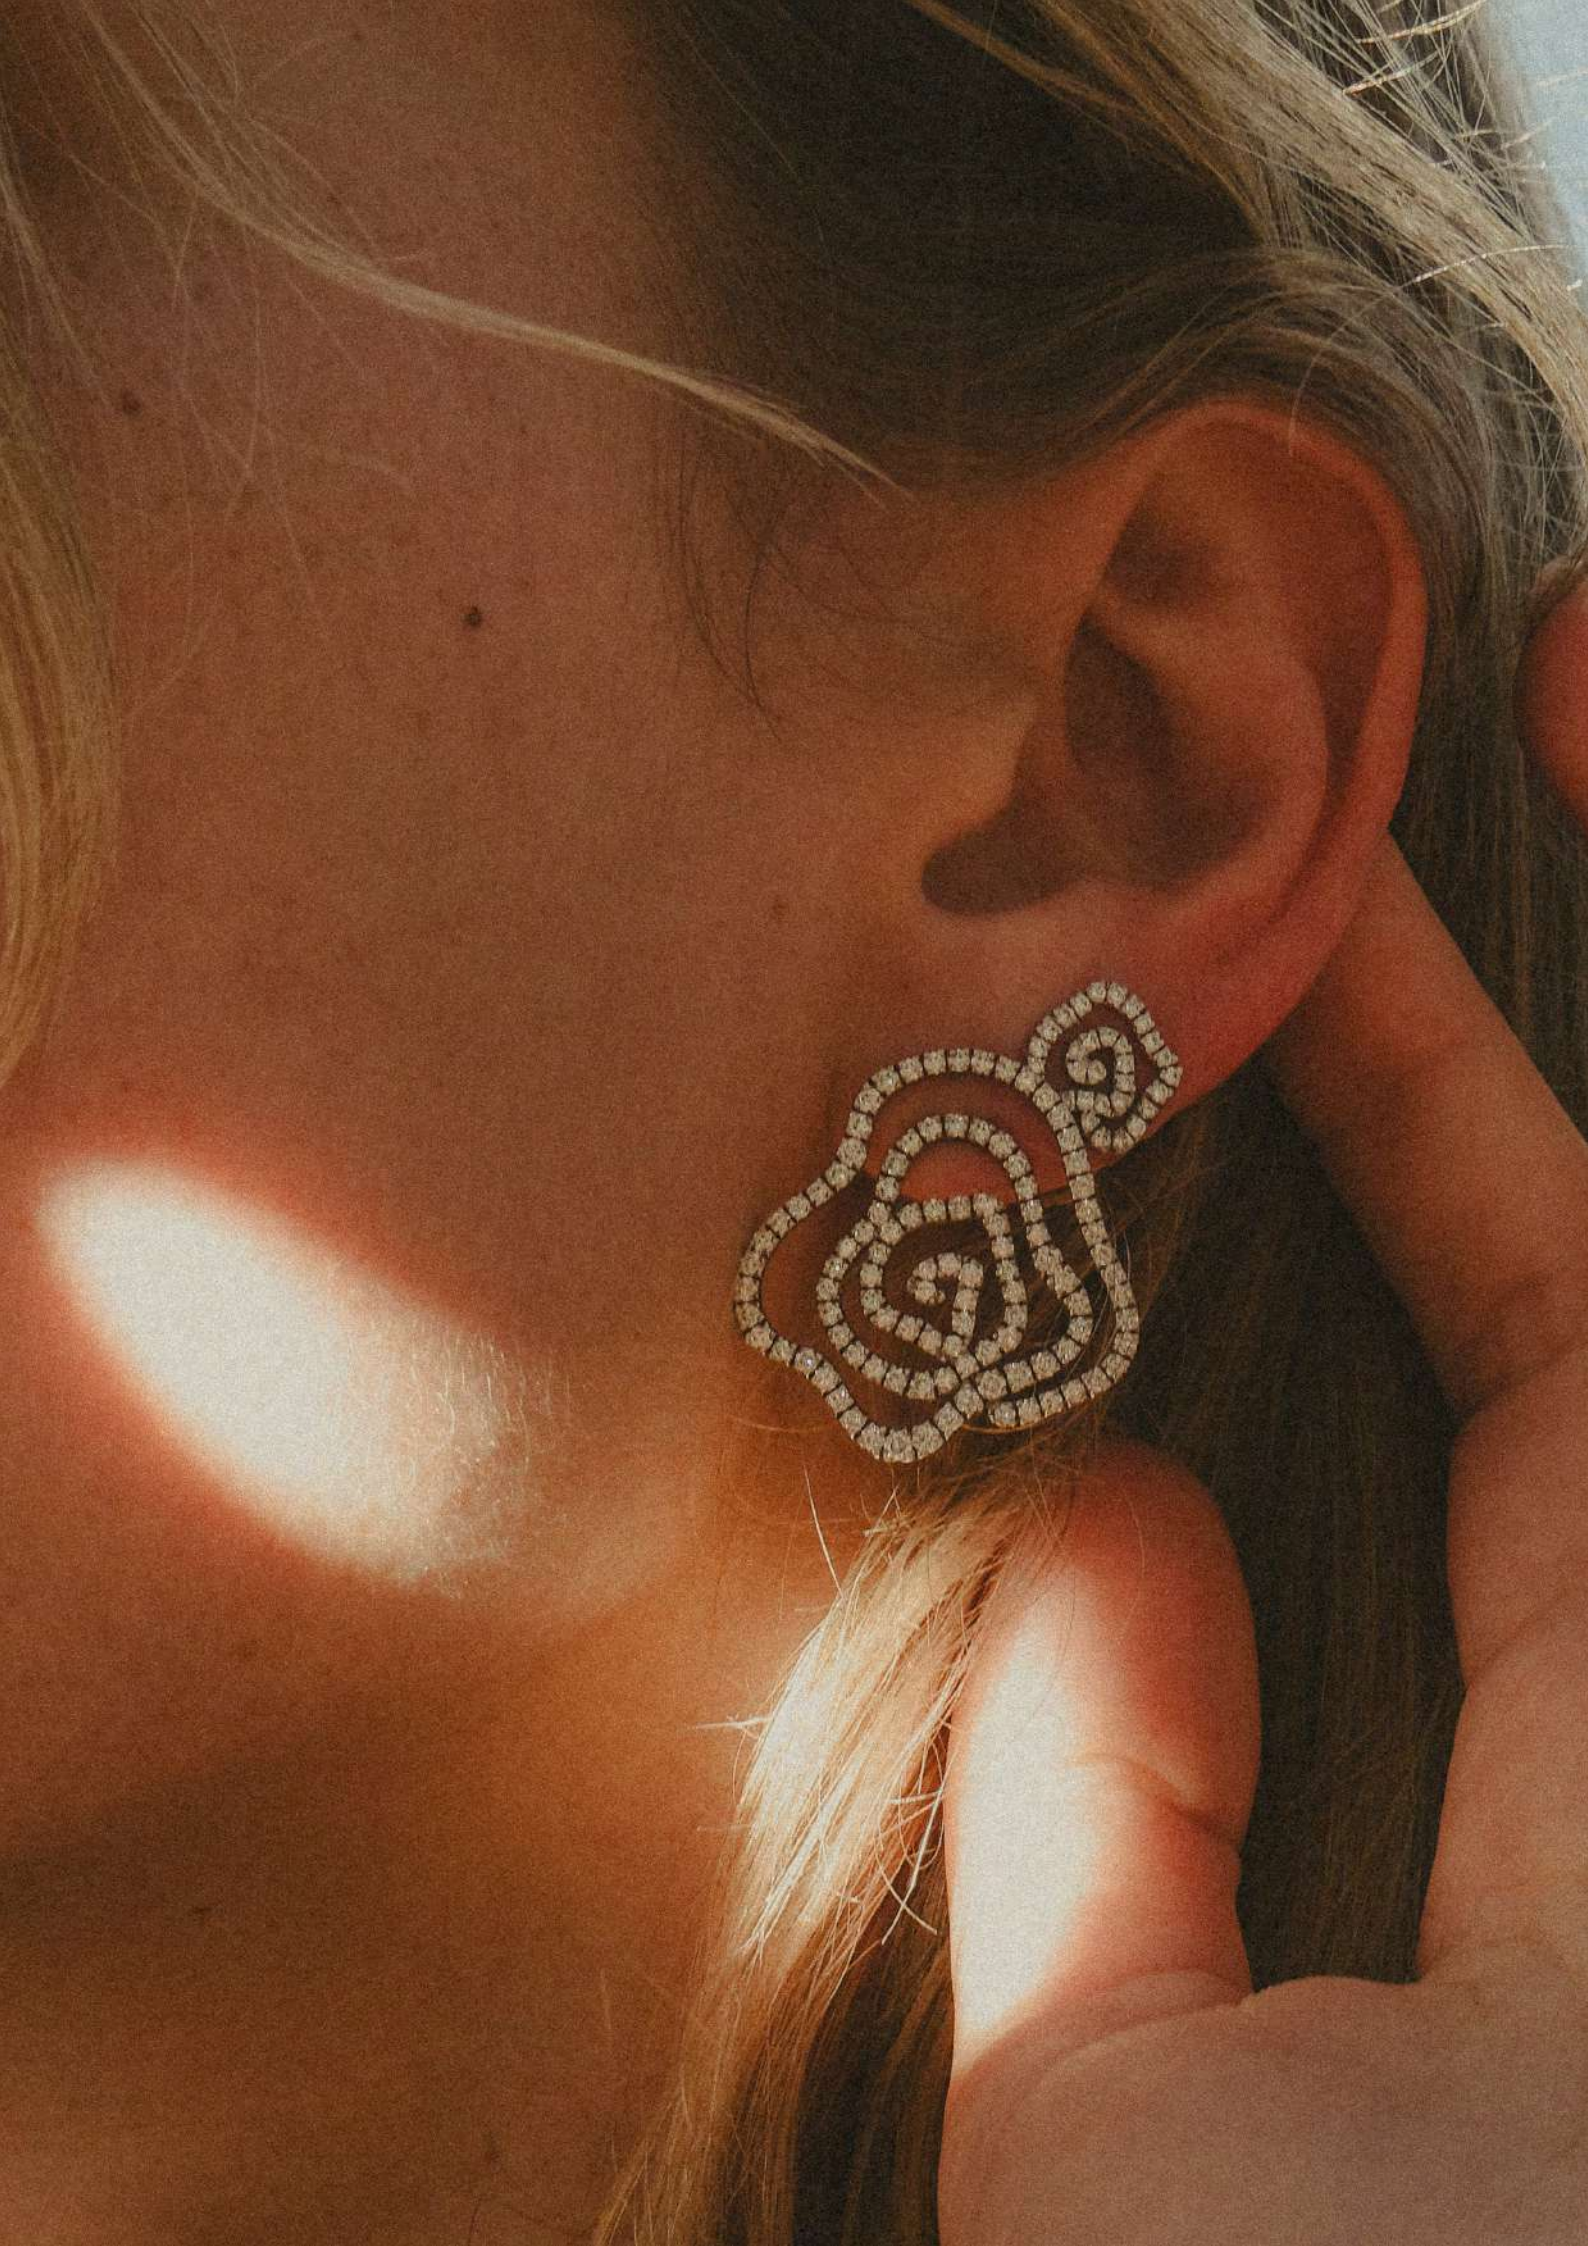

Recoleta

Recoleta transcends the art of tango to capture the very essence of passionate dance. Each piece in this collection is a symphony of graceful movements, directly inspired by the fiery steps and captivating whirls of this dance.

The sparkling diamonds on white gold add a touch of wintry elegance, reminiscent of glistening frost. Inspired by dancers who adorn their bun with flowers, the pieces can be worn uniquely, transforming every woman into a tango dancer.

The collection follows the seasons, transitioning to yellow gold and warm tourmalines to capture summer colors. It celebrates life, passion, and vitality through its jewelry.

SOL aims to inspire authentic expression through its creations. Dance becomes an invitation to fully express oneself. Each piece of jewelry becomes a dance partner, reminding us of the timeless magic of this form of expression.

COLLECTION 05

Solset

The Solset collection captures that fleeting moment when the sun slowly disappears beyond the horizon. It draws inspiration from the infinite shades of a sunset over the sea. Luminous oranges, soft pinks and deep reds evoke the warmth of the sky at dusk. Gradually, the light turns to velvety violets and glowing yellows, like the final breath of the day.

Along the horizon, the sea introduces its own palette vibrant greens, blue-greens and luminous turquoise. Together, these tones create a rich and painterly harmony. Pearls evoke the quiet movement of water and the softness of evening tides. Each piece becomes a subtle composition of color and light. Worn alone or layered, Solset jewels form a personal landscape of sunset hues. A collection designed to carry the warmth of summer with you.

ABOUT

The Designer

The designer

Born in 1990 in sunny southern France, Julie Sanguignol shaped her personality through the creative spirit of her mother, also artist at the time. Her father shared his passion for precious stones and the jewels that he used to designed for his wife.

Later, Julie studied business in Barcelona, Paris, New York, and Buenos Aires where she opened up to new inspirations. Then, she went into the world of gemology by working for a stone dealer whose clients were the jewelers of Place Vendôme. She had the chance to see stones of rare quality intended to French fine jewelry, that inspired her to start drawing her own designs.

She studied at the Gemological Institute of America in the famous «Diamond District» in New York, where she learned the essential knowledge to be a gemologist specializing in diamonds and colored stones.

When she returned from the United- States, SOL became an actual project while she was living between France and Portugal.

The brand allowed her to bring together everything that fascinates her within a single project: the passion of jewelry design and the search for quality stones. At the first 2020 lockdown, the adventure started.

ABOUT

Craftmanship

Craftmanship

Our production is based both in Paris and Portugal. We have different ateliers for different parts of the production. SOL is committed to manage and minimize its impact on the environment. We produce in small quantities with 18K recycled gold. We collect materials from previous jewels and give them a second life in a different form.

Moreover, hunting for jewelry at Auctions houses is an adventure and some pieces can be very inspiring.
In addition, we select our stones with our gemologist team, trained and certified from GIA (Gemological Institute of America). We favor natural stones and ensure to respect Kimberley's process. Each stone is precious, and we want to protect and share its value.

Our diamonds are carefully selected in F colour and VVS to VS1 clarity, always featuring an Excellent ("EX") cut for optimal brilliance. Our pearls are sourced from Japan, our coloured gemstones from India, and our diamonds from Canada origins renowned for their exceptional quality.

Each piece can be fully customised, from the choice of gold colour to the selection of gemstones. Bespoke modifications and transformations of any design can also be discussed upon request and quotation.

ABOUT

The vision

The vision

Jewelry is much more than an accessory. It is part of an identity. Wearing small diamonds on your ears or imposing hoops does not express the same message. The most important thing is to feel at one with oneself, as in our clothes, free of our movements. For this, our prototypes are tested in different situations.

In each collection, a story is told, it is a witness of what we like. SOL is a gesture, a music, a color, a smell and a temperature. We advocate movement and expression, we don't want to prevent them, but only to magnify them.

We see jewelry as pocket-sized sculptures, wearable art. Expression first through creation, then through the way each piece is worn.
